

Landed Properties

Collecting security fees can be tough in landed neighbourhoods. JaGaRonda allows residents the ability to view guards' patrols in real-time, giving them a reason to pay security fees.

High-Rise Properties

Our smart routing feature allows you to create virtually infinite number of routes, giving you total flexibility to handle high-risk areas in your property.

Industrial Properties

JaGaRonda is uniquely designed to handle different routes, intervals, and scenarios when incidents happen. All these features are backed by a suite of reports easily exported anytime too.
